Statement of Intent

Food/cooking

Pre-planning

Brianstorm 5 ideas for a website

- Bubble milk tea
- Fanta
- Solo
- Curry
- Instant noodles

Get feedback

Refine your idea

- Who - Young austral tourists who are travelling to Kyoto
- What - A website showing a map with hotspots and tips for connecting to teh wifi
- Why - Young people need to be connected
- How - They will be able to comeple their IST assignment while overseas

Example: I want to make a website to help people with mobile phone addiction

Who: Australian teenagers my age who feel they are using their mobile phone too much

What: Some sort of calculator that tells them how much time they are on teh phone and teaches them about how overuse effects

Why: they know they are using phone too much but not sure what to do

How: knowledge or strategies to reduce phone usage

My Example: How to make instant noodles

Who: All types of age who want to make an instant noodle

What: A website that explains how to turn instant noodles into delicacies.

Why: For people who don't have enough time to make a proper dinner.

How: Knowledge or strategies to turn instant noodles into delicacies.

Statement of intent:

[3-4 extended paragraphs or about ½ a page]

I intend to make a website...

My website will include.... Because...

From visiting my website ...

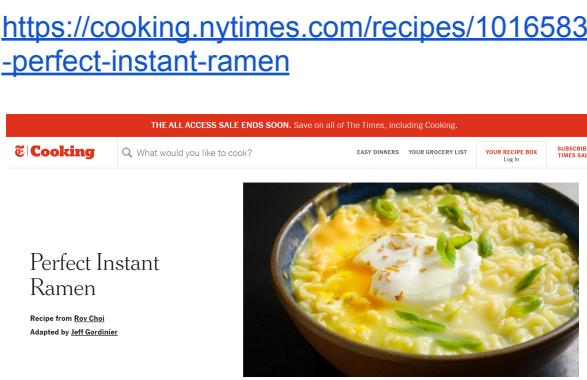

I have a vision of creating a website that caters to individuals who are new to cooking or those who may lack experience in the kitchen. With a goal to help such people learn how to cook instant noodles, the website will provide detailed step-by-step instructions, tips, and suggestions on how to prepare instant noodles to perfection. The instructions will cover different types of instant noodles and different preparation methods, along with suggestions for enhancing the flavor by adding different spices, herbs, and vegetables.

Furthermore, the website will offer pairing suggestions to help visitors create a complete and satisfying meal with their instant noodles. This can include pairing noodles with different meats, vegetables, or sauces that compliment the noodles' flavors. To ensure that visitors can get the most out of the website, the user will also address frequently asked questions, such as how to choose the right type of instant noodles, how to store them properly, and how long they can be kept.

Overall, I hope that the website will serve as a comprehensive and informative resource that can help anyone learn how to cook instant noodles. By providing clear instructions and useful tips, the user aims to empower visitors to gain confidence in the kitchen and enjoy delicious meals made with instant noodles.

Existing Designs

[1½ pages 3-4 designs, atleast 1 in mobile view]

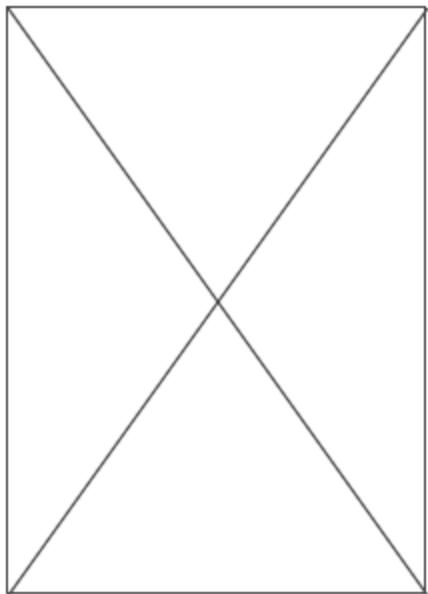

<p>https://cooking.nytimes.com/recipes/1016583-perfect-instant-ramen</p> 	<p>The website includes the steps, ingredients and comments on improving the recipe. It's also the way chef Choi makes his instant ramen, an opinion from an expert is crucial for a recipe.</p>
<p>https://www.seriouseats.com/diy-instant-noodle-cups-food-lab</p>	<p>The writer had an entire story related to their findings of their ramen. Ingredients and time is crucial for the creation of a ramen and all</p>

	<p>her ingredients are easy to find whilst it barely takes time to make her food. The process for her creation is simple unlike chefs trying to turn ramen into a delicacy.</p>
<p>https://www.foodbymaria.com/instant-noodles/</p> 	<p>It is healthy, quick, delicious and can be a meal prep used by gym goers. The ingredients used by her are environmentally friendly. The preparation is easy and quick. We could easily customize her concoction.</p>
<p>https://www.wikihow.com/Make-Instant-Noodles</p> 	<p>There is feedback made by those who tried the process. 3 ways are taught on how to make instant ramen. It is an easy process to make the product and it could be eaten as a comfort food. Ingredients are easy to find.</p>

Wireframe persona

Persona 1: Lily

User Persona 1: Jane

Jane is a 25-year-old student who lives alone and enjoys cooking simple and healthy meals at home. She is looking for a recipe app that is easy to use and helps her find quick and easy recipes that fit her dietary restrictions.

Wireframe Mapping for Jane:

- Jane needs an app that is easy to use, so the wireframe should have a simple and straightforward design with clear instructions and labels.
- Jane wants to find quick and easy recipes, so the wireframe should have a section for quick and easy recipes, sorted by meal type and dietary restrictions.
- Jane is health-conscious, so the wireframe should have a feature that allows her to search for recipes with nutrition information and ingredients.

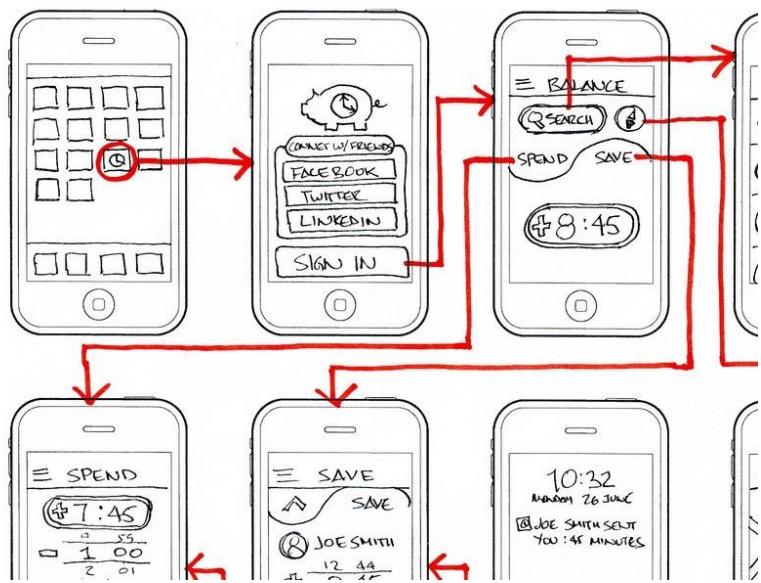

User Persona 2: Mike

Mike is a 40-year-old chef who owns a restaurant and wants to create a mobile app to promote his business and showcase his menu. He wants an app that is sophisticated, interactive, and visually appealing.

Wireframe Mapping for Mike:

- Mike wants to showcase his restaurant menu, so the wireframe should have a menu section that displays his dishes, including descriptions, prices, and images.
- Mike wants an app that is visually appealing, so the wireframe should have an eye-catching design with high-quality images and graphics.
- Mike wants an interactive app, so the wireframe should have a reservation feature that allows customers to make reservations, and a review section that allows customers to leave feedback and ratings. The app could also include a feature that allows customers to order takeout or delivery.
